MIDDLE SCHOOL

This is a great time to spark your curiosity—there are so many interesting career possibilities out there!

- Check out the Museum of Science and Industry and all it has to offer!
- Listen to a really cool podcast called Brains On!

- Biz Kids will help you learn about business administration topics such as credit and debt.
- See why job shadowing is a good idea.

- Explore health and physical education careers from the one and only Bill Nye the Science Guy...
- ...or from the smart folks at PBS.

- Listen to Tumble—"The Science Podcast for Kids"!
- And be sure to check out some cool science lessons at the Mystery Science site!

- Check out Shedd Aquarium's "Stay Home with the Shedd" activities!
- BrainPOP is a good resource to brush up on science and math skills.

HIGH SCHOOL

Now is when you should start to create networks, seek out opportunities, and explore experiences so you can establish a focus.

- Get an early start learning about cybersecurity and STEM through virtual cybercamps.
- Listen to NPR's Science Friday radio show for entertaining and educational science and technology stories.

- Future Founders will teach you about entrepreneurship.
- Learn why job shadowing is so beneficial to your learning process.

- Visit CAAHEP to learn about careers in Art Therapy and its benefits to individuals, families, and communities.
- Listen to Roadtrip Nation Podcast and explore career possibilities based on your interests.

- Want to build your health skills? Learn about CPR classes (and more) at the Red Cross.

- Download this activity packet from the International Museum of Surgical Science: Diagnostic Detectives.

HIGHER EDUCATION

It's time to pursue your passion by advancing your specialized skills by committing to a career pathway.

- Get an early start learning Design, BlockChain and AI with IBM.

- Still need to declare a business major? This site will help you choose.
- Your Money Now is a great podcast on small business.

- Get tips from CollegeVine on how to land a research assistant position.

- Stay on top of what's happening in the field by reading the American Journal of Nursing.

- See how membership in the American Medical Student Association can help your career.
- Keep up to date on the latest in research at Science Daily.
